SUMMARY

I'm Muhammad Saqib, a BSIT student in my 5th semester who genuinely enjoys building websites that actually help people. My first web project made me realize how exciting it is to turn an idea into something real. Since then, I have worked on both frontend and backend projects, improving my skills one step at a time.

I have completed two internships at Appaura (frontend) and TechTommy (backend), working with React.js, Node.js, and PostgreSQL. I am now eager to grow as a Full Stack Developer and contribute to building impactful, user focused solutions.

KEY STRENGTHS

- Building and connecting full stack web apps with React.js and Node.js
- Designing databases with PostgreSQL and MongoDB
- Creating clean, responsive layouts using Tailwind CSS and Bootstrap
- Collaborating in teams and learning quickly from real-world challenges

EXPERIENCE

Frontend Developer Intern

July 2025 - Sep 2025

Appaura Remote

Lahore, Pakistan

- Built responsive web interfaces using React.js.
- Translated design mockups into functional components.
- Debugged and optimized frontend code for performance.
- Integrated APIs and joined code reviews.

Technologies Used: React.js, JavaScript (ES6+), HTML5, CSS3, Git

Backend Developer Intern

Aug 2025- Sep 2025

TechTommy Remote

Lahore, Pakistan

- Created REST APIs using Node.js, Express.js, and PostgreSQL.
- Designed and implemented database schemas for better performance.
- Integrated backend services with frontend features.
- Worked on deployment and Git version control.

Technologies Used: Node.js, Express.js, PostgreSQL, Supabase, Git

EDUCATION

Bachelor's Degree in Information Technology (BSIT) – In Progress

2023 – 2027

The Superior University, Lahore CGPA: 3.3

Lahore, Pakistan

| • JavaScript (Basic) – HackerRank | Oct 2025 |

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap5

State Management: Redux Toolkit, Zustand, Redux Thunk

Backend: Node.js, Express.js, REST APIs, GraphQL, OAuth.js, JWT, Socket.IO

Databases: PostgreSQL, MongoDB, SQL Server, Redis

Build & Deployment Tools: Docker, Nginx, Git, GitHub, CI/CD (GitHub Actions), AWS, Vercel, Render

Testing: Jest, Vitest, Postman, React Testing Library (RTL)

Soft Skills: Problem Solving, Teamwork, Communication, Agile Collaboration

PROJECTS

1. Weather Forecast App

Tech Stack: React.js, React Router, Tailwind CSS

- Displays real time weather updates in a responsive, user friendly interface.
- Utilized the OpenWeather API for live data fetching.
- Configured Vite for fast builds and optimized performance.

Live Demo: saqibyounas.github.io/weather.github.io

2. Information Display Page

Tech Stack: React.js, Bootstrap 5

- Focused on clean layout design, reusable component structure, and full responsiveness.
- Used Vite for fast build and optimized performance.

Live Demo: saqibyounas.github.io/mrbigbullofficial.github.io

3. Role-Based Service Management Platform (Ongoing)

Tech Stack: React.js, Express.js, MongoDB, Redis, Tailwind CSS, React Icons, React Motion, Socket.IO, OAuth.js, Cloudinary

- Developing a B2B service platform with role based dashboards.
- Supports direct service requests, tracking, and messaging.
- Uses OAuth for secure authentication.
- Implements Socket.IO for real time notifications.
- Manages media with Cloudinary.
- Focuses on modern and responsive design.
